

## FACT SHEET

# The HIPEX® Products based on ethylene vinyl acetate rubber (EVM)

## Our Know-how – Your Advantage

With HIPEX® materials from KRAIBURG TPE, engines, drive or cooling units of all kinds benefit from temperature resistance and optimized behavior to oil and lubricants.

- Alternatives to conventional rubber materials
- Thermoplastically processable
- Operating temperature depending on formulation 120 °C, 140 °C and up to 150 °C
- Hardness range 55 to 80 Shore A
- Multi-component injection molding with adhesion modifications to PA, PBT or PP
- Recyclable
- Available in natural und black colors
- Resistance to oils, greases, and lubricants

## Typical Applications

- Seals
- Mechanical components
- Fastenings
- Closures
- Flexible connections
- Damping components
- Seals for housings

## Christoph Raue Development Automotive & Industry

"HIPEX® bridges the gap between TPE and rubber materials: thermoplastic processing and outstanding performance. The product has proven itself for years with customers looking for solutions for applications involving high temperatures. We see excellent oil resistance here."
